Summary

Entry-level IT graduate with hands on experience in software development, data analysis, UI/UX design, and database management. Skilled in developing desktop, web, and mobile applications and applying technical solutions to real world problems.

Education

Far Eastern University **2022 - 2026** | BS Applied Mathematics w/ IT Track

Technical Skills

Languages: C, Java, VB.Net, Dart, Python
Web: HTML, CSS, PHP, JavaScript, React
Mobile: Flutter
Database: MS Access, MySQL
Tools: Git, GitHub, VS Code, Figma, Canva

Experience

Pateros Municipal Hall
IT Department | Intern 2025

- Supported IT staff in checking network connections and replacing faulty hardware components.

Organizational Experience

FEU Mathematics Society
2022 - 2026

- Participated in organizational events and programs that promoted academic and professional development.

Projects

Queueing Theory Based Service Optimization | *Python, Pandas, Excel*

- Analyzed customer transaction and waiting-time data using Queueing Theory and Python to evaluate service efficiency and recommend improved queue configurations.

Room Discovery Desktop Game | *Java, MySQL, Canva*

- Developed an interactive desktop game featuring hidden items, math questions, and riddles to create an engaging room exploration experience.

Reviewer System for Medtech Students | *VB.Net, MS Access, Canva*

- Developed a desktop application that helps medical technology students review lectures through interactive educational games.

POS System | *VB.Net, MS Access, Figma*

- Designed a Point-of-Sale system for a laundry business. Features include customer transaction records, sales report, accounts, customers and service management.

Mobile Health Record Management and Patient Reminder Application | *Flutter - Dart, Figma*

- Developed a front-end mobile application using Flutter to help users track vital health metrics and receive medication or appointment reminders.
